Professional Summary

Recent Computer Science graduate with 2+ years of experience developing and deploying data automation tools and technical solutions in enterprise environments. Built and delivered a digital crew log used across 100+ vessels, improving visibility into operational discrepancies. Seeking an entry-level Help Desk or HRIS role to apply my technical and problem-solving skills while building a strong foundation in systems, support, and enterprise tools, with the goal of advancing into software development.

Technical Skills

- **Languages:** C++, CSS, HTML, Javascript, Python, SQL
- **Tools:** Docker, GitHub, Ignition, MSSQL Server, Postman, Power BI, Power Apps
- **Competencies:** Application Development, Data Analysis, Debugging, Responsive UI Design, REST API's, Scrum Methodology, Software Development Life Cycle
- **Soft Skills:** Adaptability, Collaboration, Detail-Oriented, Process and Documentation Oriented, Self-Directed Learning

Education

J.B. Speed School of Engineering, University of Louisville

Aug 2021 - May 2025

Bachelor's Degree, Computer Science

Capstone Project

Diversified Automation: SCADA System for Small Airport Baggage Handling

Aug 2024 - Dec 2024

J.B. Speed School of Engineering, University of Louisville

- Designed and implemented a supervisory control and data acquisition (SCADA) system with a focus on UI development and SQL database integration
- Collaborated with team members to complete phase 1 of project and present progress to stakeholders
- Delivered a working prototype tailored for small airport environments
- Became familiar with tools such as Docker, MSSQL Server, Azure Devops

Work Experience

American Commercial Barge Line

Sep 2024 - Nov 2025

HRIS Intern

- Maintained and configured workforce software using UKG API's and Business Intelligence tools, ensuring accurate vessel crew payroll and schedule processing
- Analyzed employee and crew data to identify system inefficiencies and employ improvements for UKG workflows, processes, and user interfaces
- Developed a digitalized Crew Log solution to replace deprecated software for over 100 barge towing vessel crews
- Highlighted discrepancies between schedules and actual timecard data using said Crew Log solution to build reports with data that had not been utilized before

The Academy of Louisville

Aug 2023 - Dec 2024

Academic Tutor

- Supported high-school students by creating personalized study plans using collaborative tools and data-analysis of performance trends, helping them master core concepts and raise their grades
- Coordinated Homework Hall independently by scheduling sessions and tracking completion, which increased student accountability and on-time homework submission
- Communicated weekly with parents and teachers, sharing progress dashboards built with Notion, to identify learning gaps and improve overall student outcomes

Asurion

Aug 2022 - Jun 2023

In-Home Expert

- Delivered and set up replacement cell phones for Asurion customers
- Communicated with customers to ensure successful delivery and set up via phone calls and messages
- Resolved issues relating to data transfers, cell carrier, resetting passwords, etc.
- Sold home technology protection insurance to customers
